Dear EPAK,

Thank you for donating money to our school to get fish and insects so we were able to experience which environment they liked best (Dry, moist, Wet). In other words you helped us learn new things in a fun way. So far we are experimenting with the 150 prods and Darkline Beetles. My teacher says we are going to do something with the fish next week. Also we have already named two fish Juan and Wigneth. We get to do these fun things all because you were kind enough to donate. Sincerely your friend, Jahla.
